

District 1 Town Hall

Agriculture & Environment

No grow in residential except for 6 plants or less

Why is cannabis more offensive than dairy or beef cattle?

Property devaluation as a result of grows in residential areas

Will the county set-up regulation for recreational MJ before or after it is legalized?

Water table is being reduced on a well

Set back requirements from public land should require actual land use and not be blanket measurement

Similar rules to winery industry. Watershed issues RRD zones

Neighbors effected by pot growing feel powerless, anxious intimidated

Impacts should be assessed every year not every three

Grows should be in hot houses and covered to control smell

Limit commercial to small and medium sites

Zoning Areas - RR, LEA, LIA DA

Do not shutout home growers from the new industry

MJ should be regulated different from food industry

Create incentives for farmers to have solar, water catchments and proper land mgmt.

Develop well-identified indoor industrial/commercial zones

Coops should not be allowed residential areas

If a property is sold will owner be required to disclose pot farm was on property?

Smell is toxic

Enforcement

Enforcement needs our support

Stop treating growers like criminals. Make it so growers can rely on law enforcement to protect medical and legal grow

Safe harbor until November

Enforcement will be easier if grows are out of neighborhoods

Concern over crime related to black market crime - law enforcement needs to protect new industry

Grow in commercial space and away from neighborhoods

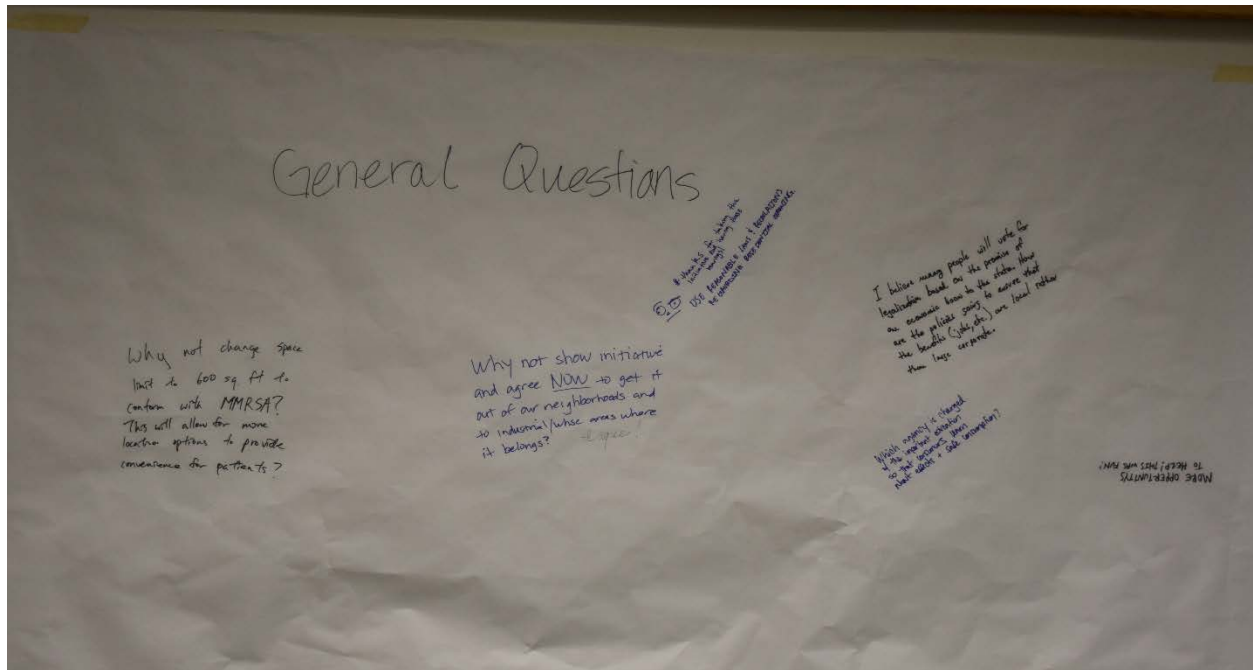

Permits need to be issued with respect to cumulative impacts - not case by case like winery permits

Concerned with crime and nuisances related to grow in rural residential areas

Concern related to water contamination of wells

County should encourage food ag, rather than ETOH and drug production

General

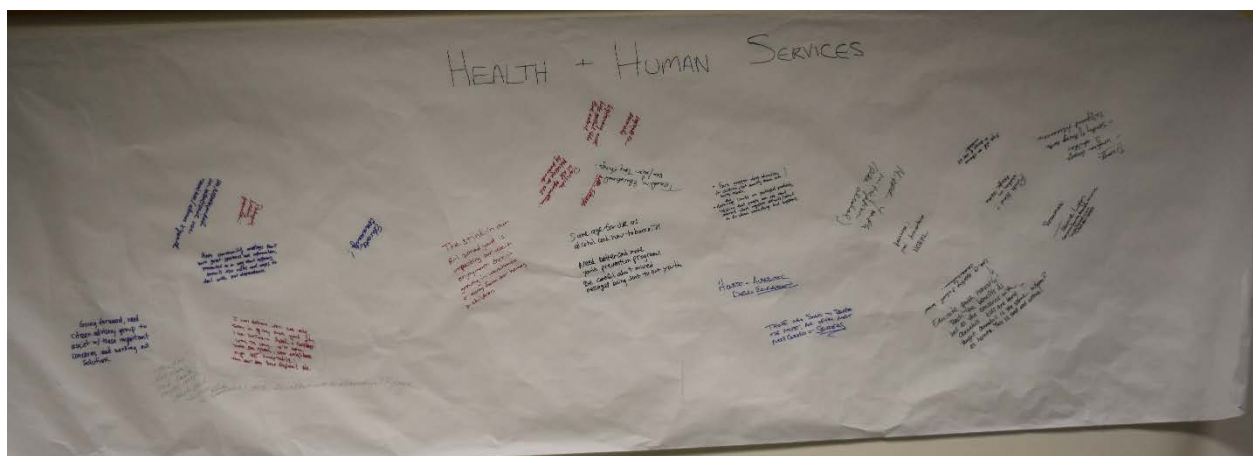

Which agency is charged with educating consumers on the effects and safe consumptions?

How are policies going to ensure that benefits to the economy are local rather than corporate?

Why not show initiative now and agree now to get it out of our neighborhoods?

Why not change space to 600sq ft. to conform to MMRSA? Will allow for more locations options and convenience for patients

Health and Human

Uniform dosage for edibles

Study of dosage amounts for different tolerances

Mirror youth mitigation like alcohol

Same age for alcohol and new age for tobacco use

Honest and authentic drug education of the benefits and concern for minors

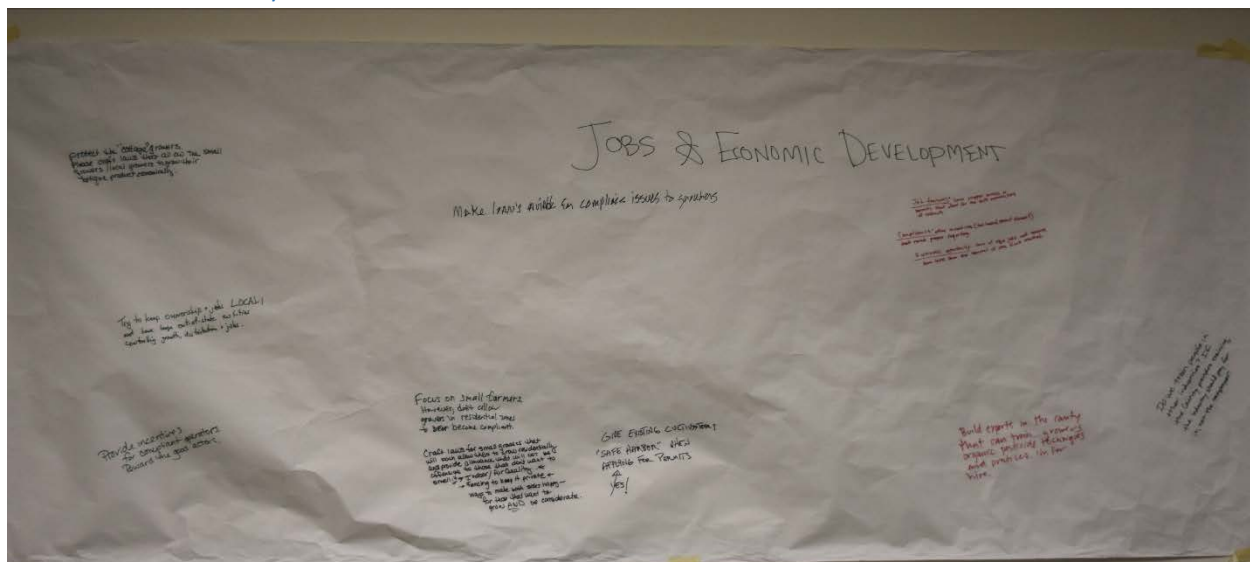

Smell in my R-1 zoned yard impacts use & enjoyment. Grows in warehouse

Citizen advisory needed to assist with concerns and working on solutions

Impacts to personal health as person who is asthmatic is unacceptable

Have community meeting guest speakers and information to inform parents of the risks and ways to mitigate pot dependence

Jobs and Economy

Give existing cultivators safe harbor when applying for permits

Provide incentives for compliant operators. Reward the goods actors

Try to keep and jobs local not out of state entities

Job training should be paid by industry

Make loans available for compliance issues to growers

Have proper trainings or permits that allow for safe manufactures of extracts for job training

Offer incentives (tax based, permit discount) that would proper reporting

Economic opportunity for tons of new jobs and revenue from taxes from the removal of the black market

Build experts in the field that can train growers for organic pesticides teachings and practices

Craft laws for small growers that will allow grows in residential zones and provide address small as a nuisance and fencing to keep it private

[illegible]

Fees for recreational use should take into account staff impact for flood of applicants who will not meet requirements & loss of time resources in processing applications

Increased taxes equates decreased participation

No cultivation taxes only – taxes on sales

Tax medical and recreational cannabis the same
